

# Finishing KS2

## Organisation:

## Ideas on what to do next:

### Making changes:

- Players can move through thirds after dribbling or passing the ball.
- Change how many players start in each third.
- Players can make tactical choices.

### Easier for some:

- Play the game with hands.
- Include extra goals for children to score in.
- Change the size of the thirds e.g. wider or unequal thirds.
- Give both teams a ball and let them play without or with limited opposition.

### Harder for some:

- Set challenges on the amount of touches required.
- Reduce the size of the thirds/Some thirds.
- Match up individuals into 1v1 or 2v2 roles within each third.

## How to get started:

- The class play a small sided game, several games may run side by side providing there is enough space to play safely.
- The pitch is split in to thirds and players assigned to a third each. e.g. each team has 1 goalkeeper, 2 defenders, 2 midfielders and 1 attacker.
- Players have to stay in their third and pass to their team mates.
- After a pass, a player can move up to the next third.
- A player can dribble in to the next third.
- 3 goals for scoring in attacking third, 2 in middle, 1 in defensive.

## Your ideas:

## Questions/Challenges:

- Can you move to a position where you can see the whole pitch, before receiving the ball?
- When is the best time to dribble and when is the best time to pass?
- Can you look to score goals when moving at speed?
- Try to shoot as early as possible.
